Forecast for Wednesday 08 May 2024

Weather: Generally fine and dry with variable cloud and periods of hazy sunshine but a bank of low cloud may sit across the Ceredigion bay during the morning hours and bring patches into the north-western part of the park. The cloud will tend to burn back to the coast during the day but may return during the evening. A dry day otherwise.

Chance of cloud-free hill tops above 800m: 70% at first quickly rising to 90%

Low Cloud and visibility: Rather mediocre through the day but poor to very poor early morning due to low cloud encroaching north-western slopes, with bases (as low as 200-300m) slowly rising above summits.

300	11/10	11/10	12/11	12/11	11/10	10/9	10/9
Valley	11/10	13/11	14/12	14/13	13/12	11/11	11/10
Freezing Level*	2200m	2200m	2100m	2200m	2400m	2200m	2100m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Rather breezy over exposed slopes and ridges.

Forecast for Thursday 09 May 2024

Weather: There may be some patchy mist and fog in the valleys early on, but these will quickly clear to reveal a fine and dry day with light winds and hazy sunshine.

Maximum wind: South or southwest 10-15mph.

Chance of cloud-free hill tops above 800m: 90%.

Low Cloud and visibility: Slight risk of mist and fog patches at first but visibility generally good to very good.

Temperature: **Valleys:** Plus 9 Celsius rising to Plus 16 Celsius
At 800m: Plus 4 Celsius rising to Plus 10 Celsius
Freezing level: Above all summits
